

AUSTIN WALDORF SCHOOL

Mobile Modular installed three handicap-accessible modular classrooms for Austin Waldorf School to create a courtyard with an existing modular classroom.

THE CHALLENGE

Austin Waldorf School serves kindergarten through 12th grade and is located on 27 wooded acres on the edge of the Hill Country. Instead of a traditional school building with several classrooms, the campus holds several cottages. Each Cottage only has one or two classrooms and is connected by granite walkways meandering around oak trees throughout the campus. The campus offers space for play, student community service gardening projects, or simply a quiet walk through the woods. Community events, such as festivals, concerts, plays, and adult education classes, create an atmosphere of cultural enrichment. Mobile Modular provided an additional three classrooms to help form a courtyard with an existing modular classroom.

THE SOLUTION

We installed a 28' x 64' double classroom along with a 28' x 40' and then connected the classrooms with a long deck and one handicap ramp. Two other sets of stairs were added to provide additional access. The customer provided their own contractors to hook up water, sewer, electrical, and communications. Several site visits prior to and during installation with this customer allowed for a smooth construction project with no surprises and a very satisfied customer.
