

# DELIVERING TEMPORARY PORTABLE CLASSROOMS FOR 193,000 STUDENTS IN FLORIDA

Classrooms, Cafeterias, Decks, Ramps, and Restrooms

## THE CHALLENGE

The Palm Beach County school district in Florida provides a top-notch education to its large student and teacher population. The district is committed to giving students access to high-quality facilities that help them reach their full potential. To achieve this goal, the district relocated two outdated schools, Verde Elementary and Addison Mizner Elementary, to a temporary campus for two years. Mobile Modular was chosen to provide the temporary campus. Traffic issues were addressed during the planning stages and communication between the district, Mobile Modular, and vendors was crucial to meet the tight schedule.

## THE SOLUTION

After overcoming hurdles around permitting and energy requirements on some of our older models, we successfully delivered and installed all 78 buildings by the first week of August. Palm Beach County School District expressed great satisfaction with Mobile Modular, our service, and our solutions that helped to create a learning environment aligned with student empowerment and growth. In light of this success, the district is already looking ahead to future partnerships and projects with Mobile Modular going into the summer of 2020.

<b>Size:</b>	72 Buildings
<b>Time:</b>	January 31, 2019
<b>Building Use:</b>	Classrooms, Restrooms, Dining Buildings, Administration Building

*Mobile Modular was very good at coordinating with our project team and when met with any challenges they were able to nip it in the bud to get us to a successful completion date.*

*Virgil Bryan, Director of Design - SDPBC*
